We use IP addresses to analyze trends, administer the site, track site use, and gather broad demographic information for aggregate use. IP addresses are not linked to personally identifiable information.

Security of Stored Information

This website takes every precaution to protect our user's information. When users submit sensitive information via the website, the information is protected both online and off-line. When our registration/order form asks users to enter sensitive information (such as credit card number and/or social security number), that information is encrypted and is protected with the best available encryption software in the industry - SSL. While on a secure page, such as our order form, the lock icon on the bottom of Web browsers such as Netscape Navigator and Microsoft Internet Explorer becomes locked, as opposed to un-locked, or open, when you are just surfing. While we use SSL encryption to protect sensitive information online, we also do everything in our power to protect user-information off-line. All of our user information, not just the sensitive information mentioned above, is restricted in our offices. Only employees who need the information to perform a specific job (for example, our billing clerk or a customer service representative) are granted access to personally identifiable information.
